

TECHNICAL DATA SHEET

OUTSTANDING FEATURES

- **Widest flow turndown ranges** available in a custody transfer grade turbine flowmeter.
- Designed to be compliant with **API Standard Chapter 5.3**.
- **Rim rotor design** offered in sizes 4"-12" provides for high pulse resolution.
- Bearing types include **self-lubricating, ceramic ball bearings and tungsten carbide sleeve**.
- Optionally available with **multiple pickup coils for redundancy or bi-directional** flow measurement.
- Rotor assembly is **hydrodynamically balanced** and "floats" on fluid cushion to provide extended bearing life.

Custody Transfer Series Rim Flowmeters

The Hoffer **CT Series** turbine flowmeters provide extremely accurate custody transfer grade flow measurement in a rim rotor design. These flowmeters are typically used in liquid petroleum products. This series is recommended for flow applications where high resolution (pulse count) is critical in order to achieve custody transfer grade accuracy.

Note: For bladed design custody transfer flowmeters we offer the API Series.
