

TECHNICAL DATA SHEET

PRODUCT DESCRIPTION

The PET Series converter receives frequency input and converts it to a proportional 4-20mA or 0-10V analog output. It has been designed to fit a compact "ELBY" explosion-proof enclosure. The frequency range is field selectable to fit most applications. ZERO and SPAN adjustments make it easy to calibrate to almost any measurement range. This series is designed for use with the Lo-Co Series of low cost flowmeters.
